SUMMARY

Software Developer with 2+ years of experience delivering scalable, responsive web applications using React.js, TypeScript, and Redux. Skilled in building role-based, multi-tenant platforms, internal productivity tools, and reusable UI components, with a strong focus on performance, code quality, and usability in fast-paced, collaborative environments.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux, Responsive Web Design

Tools & Practices: Git, GitHub, REST API Integration, Agile/Scrum, Unit Testing, Code Reviews, Debugging

Core Strengths: Role-Based Access Control (RBAC), Workflow Automation, Performance Optimization, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Software Developer

Jun 2024 – Present

Omnics Technologies Pvt Ltd — India

- Developed admin and customer-facing interfaces for a multi-tenant compliance management platform, implementing partner onboarding, customer account management, and regulation/task workflows with role-based access control (RBAC)
- Built an internal employee management system featuring an employee directory with search/filtering, project tracking, and a file manager supporting drag-and-drop uploads and previews
- Designed and implemented a leave request and approval workflow with manager actions, status tracking, and backend API integration
- Created a reusable drag-and-drop email template builder adopted across multiple products; later published it as an open-source npm package
- Built an in-app bug-reporting tool with screenshot capture, helping the support team resolve issues faster
- Delivered multilingual support (4 languages) for the compliance platform and added private/group messaging, account settings, and a multi-step onboarding wizard to the internal employee tool
- Improved page-load performance on high-volume regulation/task listing screens and added document preview and reporting capabilities

KEY PROJECTS

Admin Compliance Master — Compliance Platform (Admin Panel)

- Built the admin panel for a multi-tenant compliance platform, covering partner onboarding, customer accounts, and user role configuration
- Localized the platform into 4 languages, enabling partner firms to operate in their preferred language

Customer Compliance Master — Compliance Platform (Customer Portal)

- Built the customer-facing portal for managing regulatory tasks, questionnaires, and compliance workflows with role-based permissions
- Optimized performance on screens listing large volumes of regulations and tasks; added document preview and reporting for compliance files

Omnics Manager — Internal Employee Management System

- Built an employee directory, project-tracking module, and file manager with drag-and-drop upload and preview functionality
- Implemented private/group messaging, account settings, and a multi-step onboarding wizard for new employee setup

ACHIEVEMENTS

- Secured 2nd rank in a university-level coding competition
- Published an open-source npm package for a React email editor (npmjs.com/package/react-tailwind-email-editor)

EDUCATION

- B.Tech, Computer Science Engineering — GITAM University — CGPA: 8.97
- Intermediate (MPC) — 927/1000
- SSC — 8.5 CGPA
